

18. At the left rear side of the body disconnect the white colored stop lamp wire from the ribbed black wire and loop and tape the terminal.

Disconnect the remaining black tail lamp wire from tail lamp plain black wire. Connect the four wire end of the wiring harness for the dual rear lamps as follows:

Pink wire - to connector on ribbed black wire of main harness extensions.

Black wire with connector - to plain black wire of main harness extension.

Black wire without connector - to black wire. (Tail lamp wire previously disconnected).

Purple wire - to connector on purple wire from front.
